WE ARE

Mercy Health Foundation Fort Smith

Mercy is deeply rooted in this community and is committed to serving those in need with compassionate care and exceptional service. For over 170 years Mercy has been delivering on our promise to this community. And for all we've seen and accomplished, we truly believe our most exciting days lie ahead... whether it's completing our state-of-the-art emergency department and ICU, expanding our residency programs to grow new doctors right here at home, leveraging technology to ensure you can get care when and how you need it, or creating a whole new level of access to world-class cancer care.

And as a nonprofit health care provider, Mercy has always depended on the support of the community. Thank you for continuing to join us in our mission to bring the healing ministry of Jesus to life for our friends, families and neighbors.

"The acts of care and support we receive make a tangible difference in our ability to care for those who seek our services. Mercy is honored to serve residents of the River Valley, and with our valued community partners, our work will be sustained for generations to come."

- Amy Fore, VP Patient Services,
Mercy Arkansas Communities

We appreciate your support of Mercy!

Women with a Mission

Established in 2008, the Women with a Mission (WWAM) Giving Society has enhanced the quality of health care in the River Valley with over \$580,000 in gifts and more than 80 projects funded.

WWAM brings together women from diverse backgrounds with a common goal of making a difference through the power of giving together. With a \$1,000 annual donation, women collectively pool their resources and collaborate with Mercy administration to identify and fund creative solutions to important health care needs.

Some WWAM projects funded in 2024:

- **Spravato Chairs for Behavioral Health** | These chairs give patients a comfortable place to receive their treatment and allow us to accommodate more patients.
- **Renova Cart for Interventional Radiology** | The Renova cart enables Mercy Interventional Radiology (IR) to perform low-risk paracentesis, a procedure to remove excess fluid in the abdomen. The demand for this type of procedure has grown, and this equipment provides the Radiology department the opportunity to accommodate more patients efficiently and promptly.
- **Bariatric Parallel Bars for Physical Therapy** | The new parallel bars accommodate a range of body types while enhancing safety for both patients and caregivers during gait and balance activities.

“As a proud member of Women With a Mission, I am continually inspired by the incredible work we accomplish together. Through our collective giving, we have made a tangible impact on our community, proving that when passionate women unite, meaningful change happens.”

— Gala Forsgren, WWAM Member
